

# Twiddla

Connectivism

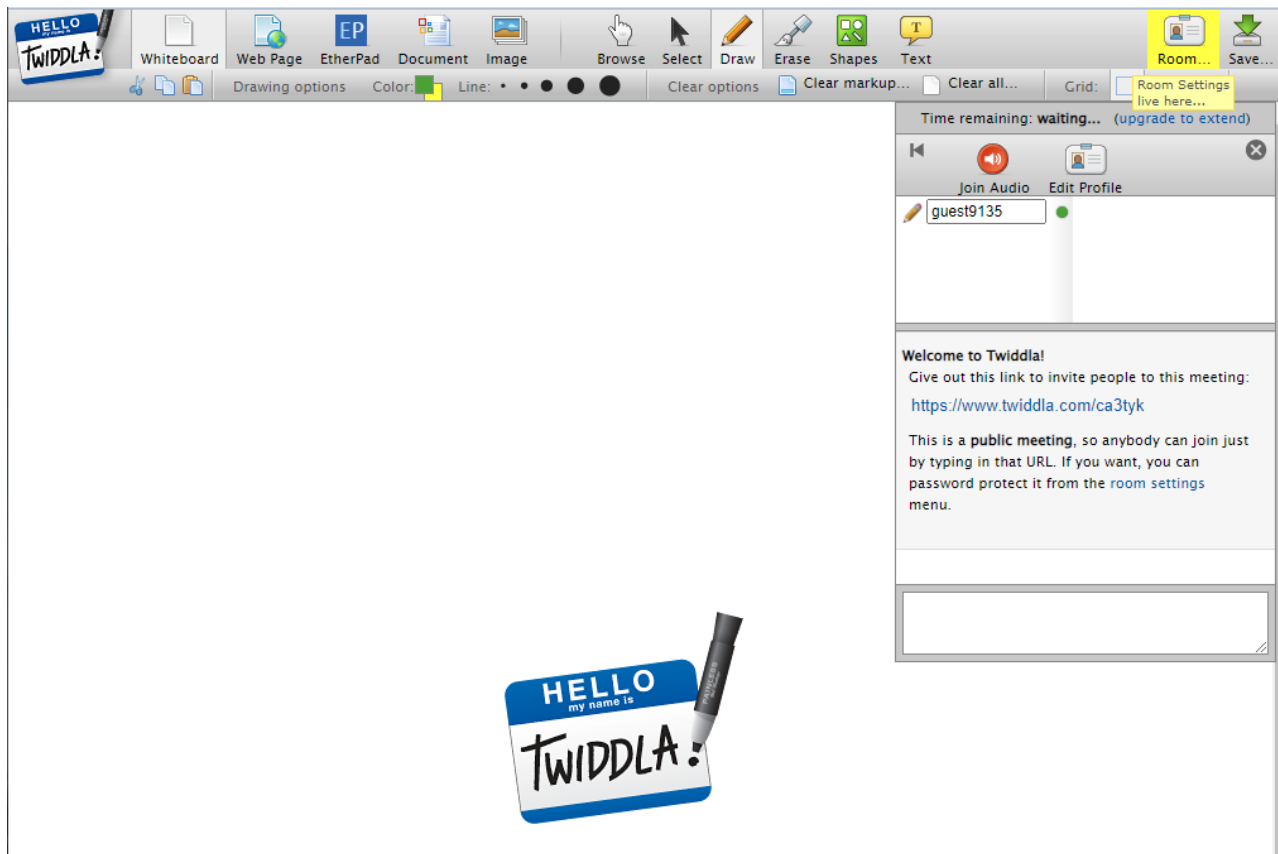

Collaboration

Social Constructivism

*[Twiddla](#) is an online platform that bills itself as one of the easiest online collaborative tools in existence. And, by many measures, Twiddla does meet its goal of maintaining a simple user interface. Twiddla was launched in 2007. [A blog is maintained](#) on the website, with updates to the tool.*

*Some of the noteworthy features of Twiddla include:*

- *Users can collaborate and make changes to images, text, drawings, and even math equations.*
- *No special software or plug in installation required.*
- *Works on both PC and MAC computers.*
- *The EtherPad function gives all users complete access to the whiteboard, with no limitations.*
- *Text-based chat and voice functions are enabled for additional forms of communication.*
- *To save work as a PDF or media file, click on the Save button on the top right corner of the screen (this last function is only available to registered users).*

<b>Ease of Use</b>	★★★★☆
<b>Privacy</b>	★★☆☆☆
<b>Accessibility</b>	★★★★☆
<b>Class Size</b>	10 participants for free account
<a href="#">ISTE*S</a>	Creative Communicator, Global Collaborator

## Usability

Twiddla allows users to collaborate in real-time on a virtual whiteboard. Users can choose to upload images, text, websites, or drawings. No plug-ins or special downloads are required to activate Twiddla. One need not be a registered user to start or join a collaborative Twiddla meeting. Real-time chat and voice functions are made available across all free and paid user tiers. Unlike some of its peers in the community-centered online tool universe, Twiddla does not

require users or collaborators to register. Those users who need assistance, however, cannot access live help in real time. Users must e-mail the help desk and wait for a resolution.

**Workflow:** The learning curve in mastering Twiddla is not steep. Clickable icons, graphical displays, and embedded windows are intuitive and visually appealing. A significant plus is Twiddla's ability to allow users to incorporate symbols used in mathematical computations.

## Price

Twiddla adopted a subscription model. For those who choose to sign up, users can choose a tier based on their identity (e.g., casual users who needs to communicate with clients; freelancers/consultants; small teams; people in suits; the big time people). While on the surface, user categories seem to cater to business types, Twiddla's blog emphasizes its utility in the classroom.

## ISTE Standards

Twiddla meets the ISTE standard for global collaboration, given the limitless number of users who can participate in multiple formats: text, voice, and drawing.

## Privacy

Twiddla is owned by [Expat Software](#), a firm that employs four workers (including the CEO). Only an e-mail address is provided for contact. There is no phone number or mailing address listed in either Twiddla's or Expat Software's website. It is unclear how long uploaded content is maintained on Twiddla's servers. Twiddla states that it will not share uploaded content with third parties. However, Twiddla also discloses that those terms may change if it is bought by another firm. Several years ago, [Google had expressed interest in Twiddla, but later decided against the purchase](#). Twiddla's terms of service states that the owners are not responsible for the content uploaded to their servers. There is no mention of COPPA or SOPIPA laws, which is intended to protect websites from collecting information from users 13 years old and younger without consent from a parent or guardian.

## Equity

Twiddla has the potential to increase tech equity among students. Students who live in rural areas, with limited access to tutors or peers who share similar extracurricular interests (e.g., Math Club), can benefit greatly. Twiddla enables rural students to have access to real-time collaboration, mentoring, tutoring, and problem-solving.

## Twiddla Overview Video

HELLO TWIDDLA! Features About API Blog Start your 30 Day Free Trial! Log in

## Twiddla is a no-setup, web-based meeting playground.

Mark up websites, graphics, and photos, or start brainstorming on a blank canvas. Browse the web with your friends or make that conference call more productive than ever. No plug-ins, downloads, or firewall voodoo - it's all here, ready to go when you are. Browser-agnostic, user-friendly.

Try it now in the sandbox  
Jump into our public session and play around.

HELLO TWIDDLA!

"Twiddla calls itself a web-based meeting playground. Not only is it a fun way to swap ideas about a website or image, it's incredibly useful as well." —webworkerdaily.com

Get the browser buttons  
Put Twiddla on your site

**It takes two, or three, or eleven**  
Make America's most popular pastime - web surfing - a team sport. Browse websites in a shared, real-time whiteboard, while marking them up, sharing files, and chatting along. It's called co-browsing; all the cool kids are doing it.

**Nothing to get in your way**  
Don't like to sign up for stuff? No worries! You don't need an account to use Twiddla - and neither does anybody else. The people you invite to meetings will never see so much as a login screen. You've got work to do. We'll stay out of your way.

**Afraid of the sandbox?**  
Have a look at these completely un-intimidating screenshots, then:

## Twiddla & the SAMR Model

- **Substitution:** Twiddla eliminates the need for students to draw the stages of mitosis, for example, on paper. Instead, students can draw and make quick revisions using Twiddla.
- **Augmentation:** Twiddla allows for real-time collaboration without users having to physically meet in person.
- **Modification:** Collaboration via screen sharing is enhanced by the inclusion of real-time text chatting and voice-to-voice communication. In addition, collaboration is not limited by geography. Twiddla enables users anywhere to join in and participate.
- **Redefinition:** Twiddla's multimodal abilities allow for seamless collaboration both synchronously and asynchronously.

## Learning Activities

### Math

Participate in a math challenge with student teams at different sites; a panel of judges can evaluate all work posted to the Twiddla whiteboard and assign points accordingly. Twiddla has the advantage of having many math symbols and geometric graphing options available.

### Foreign Languages/English as a Second Language (ESL)

Students learning a new language can annotate text collaboratively, highlighting verb forms, tenses, modifiers, etc.

### Visual Arts and Communication

Students can jointly critique a visual display or advertisement. Principles of visual communication can be assessed, with students marking up images to show evidence of eye gaze, graphic misrepresentations, etc.

## Journalism

The EtherPad function within Twiddla allows all users to write, edit, and revise text-based documents in real time. (Note: If EtherPad is not enabled, the Twiddla host needs to designate which users could have full access to the whiteboard.) Journalism students can watch a live streamed event and using EtherPad can collaboratively write a news story.

## How to Use Twiddla

1. Type [www.twiddla.com](http://www.twiddla.com) in your web browser
2. Users can elect to create a free account (or not).
3. Those users who do not wish to create an account still has access to all of Twiddla’s basic tier options (Free and paid tiers can be viewed at <http://www.twiddla.com/pricing.aspx>)
4. On the home page, find the green button marked “Go” and click on it.
5. A whiteboard is launched within the browser.
6. The Twiddla host can now upload images, documents, etc.
7. A unique URL is also provided on the right hand of the screen. This URL can be shared with all collaborators to join in real time.
8. To enable EtherPad (which allows all users to have full control of the whiteboard), click on the icon labeled EtherPad.
9. To enable voice to voice communication among users, click on the red icon labeled Audio. Speak into the computer’s microphone to ensure others can hear.
10. To begin real time text-based chat with all users, type inside the dialogue box that appears on the right side of the screen.
11. To save a snapshot of the whiteboard or a transcript of the chat, click on the “Save” icon which appears on the upper right hand corner of the whiteboard. Only registered users are permitted to save their work as a PDF file or on Twiddla’s cloud.
